Getting started with **GGPLOT2**

easy as (1) (2) (3)

(1) Download **R** and **RStudio**

Go to:

https://www.r-project.org/

https://www.rstudio.com/ products/rstudio/download/

(2) Install ggplot2

Type into your RStudio console:

> *install.packages("ggplot2")*

Remember, **install once** per machine.

(3) Load ggplot2

Type into your RStudio console:

> *library(ggplot2)*

Remember, **install once** per R work session.

Other packages you should install for today: **"dplyr", "ggplot2", "ggbeeswarm", "hexbin", "MASS", "readr"**

what's next?

Install and load the "readr" package

> *install.packages("readr")*
> *library(readr)*

>>>>>

Load your data into R

> *heart <-read_csv("http://faculty.washington.edu/ kenrice/heartgraphs/nhaneslarge.csv")*
